Sponsorship supports development of our Independent Explorer's Program

The Children's Specialty Clinic of the San Luis Valley is raising funds to build a novel, transdisciplinary therapy clinic that supports children who dance to the beat of their own drum and are building a space that conforms to their rhythm. The Independent Explorers Program will implement individualized therapy services for children with disabilities ages 0-5 experiencing moderate to severe behaviors who cannot participate in traditional 1:1 therapy or preschool settings. Independent Explorers is implementing a value-based care model to improve communication, sensory, mobility and social emotional skills so children can participate in mealtime, playtime and other daily routines. With the right support, we hope to be open and ready to provide specialty services starting Fall 2025!

What does my sponsorship support?

- Developmental screenings for communication, sensory, mobility and social-emotional delays
- Equipment for a gross motor gym and de-escalation rooms
- Furniture and appliances for Life Skills Therapy space
- Office equipment including desks and computers
- Internship and Employment opportunities for high school and college students interested in healthcare professions
- Central air conditioning for the building
